HERON RESOURCES LIMITED

ABN 30 068 263098

The Company Announcement Officer
Australian Stock Exchange Limited
Post Office Box H224 - Australia Square
SYDNEY NSW 2000

6 February 2007

Dear Sir / Madam

Access to Bulong Avalon Resources

Heron Resources Limited (ASX:HRR) (Heron) has completed an assessment of the potential tonnage of resources within the Bulong Avalon tenements which may be impacted by LionOre Australia (Avalon) Pty Ltd (LionOre) giving notice of termination of access negotiations as announced to the market on 1 February 2007.

A total of 227.2 million tonnes from a total KNP mineral resource of 903 million tonnes is contained within the Bulong Avalon tenements which were subject to access negotiations between Heron and LionOre.

It should be noted that the Bulong mineralisation is dominantly nontronite located approximately 120 km by road from the main Goongarrie resource areas which are host to the screen upgradeable limonite mineralisation which Heron has previously focused on for pressure acid leach processing.

The Bulong resources have no impact on the resource base of the Jump-up Dam Heap Leach project which is unaffected and continues to progress well toward delivery of the scoping study.

Heron is considering its position in response to the action taken by LionOre and will keep the market informed.

Yours faithfully

N. Mathew Longworth
Managing Director
HERON RESOURCES LTD
