Market Cap	\$39.7M
Cash (30 June 2015)	\$24.0M
Investments	\$ 2.3M
Total C+I	\$26.3M

Heron Resources Limited (ASX:HRR TSX:HER, “Heron” or the “Company”) is pleased to advise that it has completed the stage 1 \$6.8 million investment from Greenstone Resources L.P. (“Greenstone”) announced to the market on 24 July 2015 (“the Placement”).

The Placement complements the Company’s cash balance of \$24.0 million at 30 June 2015, with additional funds which are to be used for the development of the Company’s Woodlawn Project and for working capital and general corporate purposes. The Placement was priced at 12.6c per share and represents a significant premium to the trading price of Heron equities at the time the transaction was announced.

The Placement of 54,131,658 ordinary shares has been made within the Company’s 15% placement capacity pursuant to ASX Listing Rule 7.1. Following completion of the Placement, Greenstone will be Heron’s largest shareholder with a 13% interest.

As noted in the release on July 24, 2015, the agreed arrangements also envisage a potential additional investment by Greenstone of \$13.2 million (or such amount as would take Greenstone’s interest to up to 19.9% of Heron shares) as a contribution towards the equity funding component of the staged construction of the Company’s Woodlawn Zinc-Copper Project (“Project”). Any such additional funding is subject to the Company making a decision to proceed with the staged development of the Woodlawn Project, and with Greenstone being satisfied with the proposed terms of any such fundraising.

About Heron Resources Limited:

CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION

This news release contains forward-looking statements and forward-looking information within the meaning of applicable Canadian securities laws, which are based on expectations, estimates and projections as of the date of this news release. This forward-looking information includes, or may be based upon, without limitation, estimates, forecasts and statements as to management's expectations with respect to, among other things, the timing and amount of funding required to execute the Company's exploration, development and business plans, capital and exploration expenditures, the effect on the Company of any changes to existing legislation or policy, government regulation of mining operations, the length of time required to obtain permits, certifications and approvals, the success of exploration, development and mining activities, the geology of the Company's properties, environmental risks, the availability of labour, the focus of the Company in the future, demand and market outlook for precious metals and the prices thereof, progress in development of mineral properties, the Company's ability to raise funding privately or on a public market in the future, the Company's future growth, results of operations, performance, and business prospects and opportunities. Wherever possible, words such as "anticipate", "believe", "expect", "intend", "may" and similar expressions have been used to identify such forward-looking information. Forward-looking information is based on the opinions and estimates of management at the date the information is given, and on information available to management at such time. Forward-looking information involves significant risks, uncertainties, assumptions and other factors that could cause actual results, performance or achievements to differ materially from the results discussed or implied in the forward-looking information. These factors, including, but not limited to, fluctuations in currency markets, fluctuations in commodity prices, the ability of the Company to access sufficient capital on favourable terms or at all, changes in national and local government legislation, taxation, controls, regulations, political or economic developments in Canada, Australia or other countries in which the Company does business or may carry on business in the future, operational or technical difficulties in connection with exploration or development activities, employee relations, the speculative nature of mineral exploration and development, obtaining necessary licenses and permits, diminishing quantities and grades of mineral reserves, contests over title to properties, especially title to undeveloped properties, the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other geological data, environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins and flooding, limitations of insurance coverage and the possibility of project cost overruns or unanticipated costs and expenses, and should be considered carefully. Many of these uncertainties and contingencies can affect the Company's actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, the Company. Prospective investors should not place undue reliance on any forward-looking information. Although the forward-looking information contained in this news release is based upon what management believes, or believed at the time, to be reasonable assumptions, the Company cannot assure prospective purchasers that actual results will be consistent with such forward-looking information, as there may be other factors that cause results not to be as anticipated, estimated or intended, and neither the Company nor any other person assumes responsibility for the accuracy and completeness of any such forward-looking information. The Company does not undertake, and assumes no obligation, to update or revise any such forward-looking statements or forward-looking information contained herein to reflect new events or circumstances, except as may be required by law.
